Tegal City, Central Java, Republic of Indonesia

Fullstack Developer with hands-on production experience in healthcare enterprise systems. Proficient in Laravel, PHP, Vue.js, and MySQL, with a track record of implementing and maintaining real-world features on MorHuman HRIS used by clinics and hospitals. Experienced in professional Git workflows including branching, code review, and merge requests. Seeking a Fullstack Developer role in an enterprise environment.

Work experience

PT Medika Digital Nusantara (MORBIS) - Jl. Puntadewa No.60, Pugeran, Maguwoharjo, Kec. Depok, Kabupaten Sleman, Daerah Istimewa Yogyakarta

Aug 2025 - Dec 2025

Programmer Intern

PT Medika Digital Nusantara (MORBIS) is an IT company specializing in healthcare technology, specifically the development of Hospital Management Information Systems (SIMRS). MORBIS provides web-based applications to support human resource management, attendance, work scheduling, payroll, and hospital operational reporting. The systems developed are used by healthcare institutions to improve operational efficiency and data integration.

- Involved in the development and maintenance of the MorHuman (SIMRS) personnel system.
- Implemented new features and bug fixes based on QA documents and internal tickets.
- Resolved issues in the personnel, scheduling, attendance, transfer, and overtime modules.
- Debugged the Laravel backend and frontend (Blade, Vue.js, jQuery).
- Adjusted business logic to meet hospital needs and operational policies.
- Resolved code conflicts (merge conflicts) using Git with a professional workflow (branch test, review, merge to main).
- Collaborated with the Programmer, QA, and CS teams in an enterprise environment.

Innolegalist - Soho Millenia, Jl. Raya Dago No. 2 Kabisaran, Kec. Parung Panjang, Kab. Bogor, Provinsi Jawa Barat

Oct 2025 - Jan 2026

Fullstack Developer

Innolegalist is a company that provides business establishment and legal administration services in Indonesia, under the auspices of PT. Triipta Karsa Inovasi, together with INNOTAXIA, a division that provides professional accounting solutions.

- Built and launched a production-ready website for a real client as a solo web developer, covering UI/UX, frontend, and deployment preparation.
- Developed a Single Page Application (SPA) using React, Vite, and TypeScript with a modular and maintainable code structure.
- Implemented a responsive and professional UI using Tailwind CSS and shadcn-ui, tailored to the brand's needs and the credibility of the legal service.
- Implemented clear application routing and page structure using react-router-dom for an optimal user experience.
- Prepared a website that was SEO-ready, scalable, and flexible for future backend/API integrations.

PT Duta Pratama Teknologi - Jakarta Barat, Indonesia

Feb 2024 - Mar 2024

Junior Network & IT Infrastructure Technician

PT Duta Pratama Teknologi is an IT infrastructure services and comprehensive technology solutions company in Indonesia, providing services ranging from computer systems and information technology consulting, data centers, cloud computing, and on-site troubleshooting for corporate and enterprise clients. Located in West Jakarta, the company is known for providing high-quality, cost-effective IT infrastructure solutions to clients across various industries.

- Execute the physical installation and configuration of new server rack infrastructure for client data centers, including the efficient installation of PDUs, cable management, and patch panels.
- Manage cabling and labeling, and integrate network devices (switches, routers, servers) to ensure system order and readability of the network structure.
- Participate in the testing and commissioning of network systems and servers after installation to ensure reliability and optimal technical operational performance.
- Contribute as part of a team of infrastructure technicians on real-world projects, completing tasks with cross-team coordination and in accordance with company operational standards.

Education

Universitas Harkat Negeri - Jl. Mataram No.9, Pesurungan Lor, Kec. Margadana, Kota Tegal, Jawa Tengah

Aug 2022 - Nov 2026 (Expected)

Bachelor of Informatics Engineering, 3.30/4.00

- Programming Division Manager at Forti (Information Technology Forum)

Organizational experience

Forti (Forum and Research) - Tegal City, Indonesia
